Capro FL-7

the "quick-charge" unit

The ultra-modern FL-7 works on newly developed, built-in nickel-cadmium batteries that recharge fully in barely 3 hours. You simply place it on the unique quick-change stand, pick it up 2½ to 3 hours later, and you're ready for another 50 flash shots. You get plenty of light output, too. Kodachrome II guide number is 40.

A unique, built-in swivel mount enables you to attach the FL-7 to your camera accessory shoe in vertical or right or left horizontal position, whichever is most convenient. Other Capro FL-7 features: Special "amber" flash tube for life-like skin tones; open-flash release; exposure calculator; neon ready-light; wide-angle 60° picture coverage; 1/1000th sec. flash duration; recycling time, 7 seconds. The moderate price includes quick-charge stand and PC synch cord.

Capro FL-5

the versatile quality flash

Here is a modestly-priced unit featuring the unique Capro "amber" flash tube. The compact FL-5 uses four penlite AA batteries, gives up to 300 flashes per set of alkaline cells, and as many per charge with nickel-cadmium batteries. A built-in terminal lets you recharge the latter without removing them from the unit, using the accessory charger attachment.

Recycling in just 3-5 seconds, the FL-5 delivers flash after flash, as quickly as you operate your camera. Kodachrome II guide number is 30. You enjoy full picture coverage, even with wide-angle lenses.

Other FL-5 features: 1/1000th sec. flash duration; exposure calculator; neon ready-light; standard PC synch cord.

CAPRO FL-5 OUTFIT also includes four rechargeable nickel-cadmium batteries and UL-approved battery charger at a special, money-saving price.

Capro FL-4

recycles in just 3-5 seconds

With the FL-4 you can fire off shot after shot only seconds apart, confident that the unit is ready to deliver its full light output. What's more, you get up to 400 flashes and more with one set of 4 penlite alkaline batteries (up to 150 with carbon-zinc cells). Kodachrome II guide number is 28; Kodacolor X, 53.

The Capro FL-4 fits all standard camera accessory shoes. Features include: wide-angle 65° picture coverage; 1/1000th second flash duration; exposure calculator; neon ready-light, and PC synch cord.

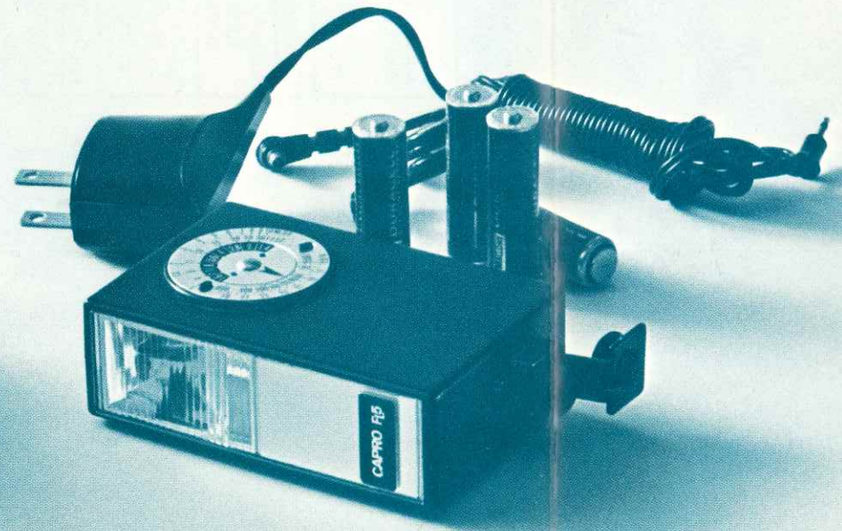
Capro FL-3

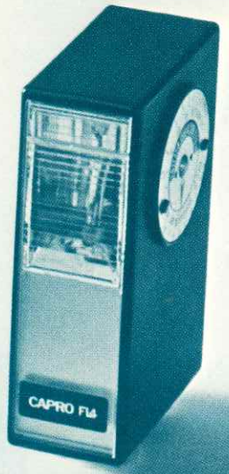
ultra-economical, ultra compact

The FL-3 costs no more than many flashbulb units, yet gives you the action-stopping speed, convenience and long-life performance characteristic of electronic flash. Despite its low price, it offers the special Capro "amber" flash tube that assures natural skin tones with color shots.

Powered by 2 penlite batteries, the FL-3 gives up to 150 flashes per set of alkaline cells. Also has built-in terminal for recharging nickel-cad batteries inside the unit, using charger accessory. Guide number with Ektachrome X, 40; Kodacolor X, 45; Ektacolor S, 48; Ansco 200, 80; Ansco 500, 110.

Other Capro FL-3 features: exposure guide; neon ready-light; open-flash release; 1/1000th second flash duration; standard camera shoe mount, and self-storing PC synch cord.





convenient

What could be more convenient than having the light you need for your pictures right in your pocket! Owning a Capro flash can mean just that. Battery-powered, it's so light and compact you can take it along wherever you go. Simply slip it onto your camera, flip a switch and, seconds later, you're ready to fire away. You never have to fuss with flashbulbs or worry about running out.

reliable

Using modern, solid-state electronics, Capro units are designed to deliver ten thousand flashes or more, and to perform reliably throughout their long and useful life.

economical

It costs remarkably little to enjoy the advantages of a Capro electronic flash. What's more, the unit quickly pays for itself because you never have to buy flash bulbs.

new "amber" flash tube

The unique "amber" flash tube was specially developed by Capro to eliminate the bluish tint often noticeable in color shots taken with electronic flash. Capro units with the new "amber" flash tube precisely match the color balance of daylight color films, assuring life-like skin tones and more pleasing colors generally.

Capro Electronic Flash Units Comparison Chart

	FL-7	FL-5	FL-4	FL-3
